- How to involve and engage operators in continuous and focused improvement
- Ready to implement
- Understanding the impact

Target Audience:

General Managers, Operation Managers, Finance Managers, Manufacturing, Maintenance, Human Resource and Safety Managers, Production / Industrial Engineers, Supply Chain Managers.

Introduction

This 1½ -days Introduction to Operational Excellence Training is a powerful course to teach delegates the concepts and implementation skills necessary to implement and manage an Operational Excellence program. This will enable realizing productivity and OEE improvements throughout the Supply Chain.

Participants learn which aspects are included in Operational Excellence, how these contribute to improving performance and which results can be obtained.

This training focuses on the basic program principles and how these can be translated into daily (operating) practice. Furthermore, this training course enables delegates to concentrate on consolidating the skill-sets that are most appropriate for their company.

What makes this course unique?

The course material is based on current best practice from leading worldwide companies. We have more than 20 years' experience working throughout the World in Operational Excellence program implementation in the Food Industry, Automotive, Pharmaceutical, Aerospace, Energy, Retail, Defense, Electronics, Laboratories and Logistics Industries. Learn how **Philips Electronics** increased their OEE from 65% to more than 85%!

Course Objectives

- Introduce delegates to the concepts of Operational Excellence, Productivity Improvement, Performance Management and OEE
- Provide the participants with the understanding and techniques for an effective implementation.
- Learn about defining, measuring and tracking of Focused Improvement Projects within the Operational Excellence program as well as the validation of the benefits (results).
- Companies that already have started their journey learn about key steps on how to manage and improve the day-to-day activities.

Contents

- Operational Excellence, Productivity and OEE Improvement
- Policy Alignment and Deployment
- Establishing High Performing Teams
- Focused Improvement: Leadership and Zero Loss Thinking
- Performance Management
- Operational Excellence organisation

Method and Material

The course material is based on current best practice from leading worldwide companies. The theoretical portion of the training is reinforced by practical exercises. The course material consists of a variation of presentation, training video and 'Practical Implementation' exercises.
